- Perfect for students of all ages
- Works across the curriculum
- Easy to get started, nothing to install
- Safe for students, emails not required
- Free teacher plan

TECNOLOGÍAS DE LA INFORMACIÓN Y LA COMUNICACIÓN

Presentaciones originales

biteslide es otra forma de presentar nuestros trabajos, incluyéndoles texto, imágenes y vídeos, de forma fácil.

“ Un muy fácil de usar producto que todos los maestros querrán

Una vez registrados como alumnos o profesores, podemos comenzar a elaborar nuestros montajes, sólo tendremos que cargar en la parte izquierda los elementos que compondrán nuestra presentación.

Posteriormente desplazaremos los elementos arrastrándolos donde deseemos dentro de la zona central.

El trabajo realizado, se podrá descargar, imprimir o incrustar webs y blogs. Es una forma estupenda de desarrollar la creatividad

Reasons to try Biteslide

Students develop 21st century skills

Students learn better when they're engaged, it's as simple as that. Slidebooks are a fun way to develop your students' creativity, collaboration, communication, and critical thinking skills.

We've made research fun

We've made gathering research enjoyable. Super-fast uploads, dragging and dropping straight from Google and Youtube, and even 'Nibbling' from the web. A chore no more, students can't get enough:

Incredibly easy to use

Poor software wastes time and is counter-productive. Biteslide is incredibly easy to use, addictively creative, and the results are jaw-droppingly beautiful. Prepare to be amazed.

Perfect presentations

Once your students have applied their finishing touches, it's time to present. Fire up presentation mode and your slidebook turns into a compelling showcase.

Simple sharing

Download to your computer or print off to pin on your walls. Students can even embed their slidebooks into websites, blogs, and learning portals.

Manage students and projects easily

Software should be easy to use and help you get your job done. We've thought through every button, click, and keystroke, so you don't have to. It's so intuitive you'll be up and running in seconds.
